

BLOCK EXEMPTION

Worried about Warranty?

The Block Exemption Act 2002:

Block exemption allows the driver to have his or her vehicle repaired without invalidating the warranty of the vehicle, so long as OEM (Original Equipment Manufacturers) parts or equivalent quality parts are used along with the Manufacturer's recommended grade of oil.

This means that providing the independent garage you are using, such as Fleet Efficiency Ltd, use original parts or parts of matching quality, then the consumer no longer needs to pay the high prices that dealerships demand and the customer's warranty will remain completely valid with the dealer.

Fleet Efficiency Ltd only use quality vehicle parts. If you wish to maintain your vehicle with Fleet Efficiency Ltd during the warranty period, you can do so without invalidating the warranty.
